

Yellow Fever Vaccinations

Currently Yellow Fever vaccine is on allocation to practices and may be in short supply. Please contact the practice as soon as possible to ensure we have vaccine in stock for your travel needs.

We are a registered **Yellow Fever Vaccination Centre**. You do not have to be registered with our practice to be vaccinated here but the following points should be noted:

- The vaccination should be given at least 3 weeks before travelling.
- A consent form must be completed and sent to the practice. On receipt of this form we can offer you an appointment for the vaccination.
- The current fee for the vaccination is £55.00 - this includes the certificate which is current for 10 years and should be carried with you when travelling.

Please Note - the certificate does not become valid until 10 days from the date of vaccination.

Further information is available from the Nathnac website:
